Ms. Marlene H. Dortch, Secretary
Federal Communications Commission
445 12th Street SW
Washington, DC 20554

Dear Ms. Dortch,

I am writing to you about the news of **LightSquared**'s plans to develop a 4G-LTE network in the Boulder area. I work here in Boulder as an attorney, specializing in water law. My firm works with groundwater matters, recreational water rights, environmental matters and water supply projects. Keeping in contact with our clients, both residential and commercial is an important part of my business.

LightSquared's proposal would allow me to keep the lines of communication open between my clients and myself. It also allows for improved communications for ditch technology, real time updates on changes in water information and increased access to research in my field. This ability to remain connected when I am in the office or working in the field makes my job, and its transitions work together seamlessly.

Currently, when I am working remotely it can be a hassle to obtain all my research. If I were operating under the network that **LightSquared** could offer I would not have to make so many trips from my office to my clients and back. The kind of simple, easy access to information that this technology is offering would be invaluable to me and my colleagues.

I appreciate your attention to this matter and would encourage your support of this endeavor.

Sincerely,

Kristin Moseley
